

A (Digital) Scientific City needs Knowledgeable Citizens!

Laboratory Workshop on Academic Open Innovation with Prof. Dr. Viola Schmid on 06.07.2017 at the Lichtenberg House

Five words signal the research background of this questionnaire - Version III.¹ The completion of the questionnaire is your contribution to the

Academic Open Innovation for Jurisprudence

(Rechtswissenschaftlichen Academic Open Innovation [RAOI])

in Darmstadt. Our **credo** is that the (digital) science city (Darmstadt) needs knowledgeable citizens.² Our **vision** is that this **local** (research and teaching) reality promotes, challenges and evaluates **global** thinking. National law is (scientific)—not a one-way street in international law—and neither is international law a one-way street into national law. However, there is oncoming traffic. Issues such as the opening of airspace for commercial and hobby drones on both legal levels and therefore the practices of (registration and) control hold experience and knowledge capital for other (inter)national law in Germany, for example. This strategy is sharpened with the keyword “GLOCAL.”³ Our **mission** is the formation of the (cyber)citizen, and the means is the Academic Open Innovation event from July 6–8, 2017 in Darmstadt at the GoCore! Summit (GoCore = Governance, Compliance & Regulation), which included the second conference of the Jean Monnet Center of Excellence “EU in Global Dialogue” (CEDI).⁴ The goal of GoCore!’s research agenda is to get to the “core” of the challenges as the “heart” of the people (encompassing both translations of the English term “core”).⁵ Five words signal five questions—the number of the fingers in Darmstadt’s symbolic five-finger tower as well.

The following information is voluntary if you would like to stay in contact with us and the Rechtswissenschaftlicher Academic Open Innovation (RAOI):

RAOI-Event	
Last name, First name	
E-Mail Address	

(The entire questionnaire does not need to be filled out. Please send any questions to schmid@cylaw.tu-darmstadt.de.)

¹ Questionnaire Version III from 16.01.2019 (in connection with Version I, created 02.05.2017, and Version II, created 19.06.2017).

² „Civil Rights“: the question of the Cybercitizen – therefore, the “citizens” of the 5th dimension of being (in addition to m³ and time) is a current topic of research and it is not exhausted in civil and the German concept of (constitutional) law (Art. 116 GG). Academic **Open Innovation** illustrates this point.

³ Prof. Schmid’s perspective is the “TCA-Formula,” namely: “Think Globally, Consider the European Union and Act Locally.”

-
- 1) What does “law“ mean for you and what do you want to know about “law?”

 - 2) Which risks should the law protect against?

 - 3) What contributions can or should the law make (regarding the diffusion of technology in particular)?

 - 4) How do you perceive the function and meaning of the law...
 - a) in regards to the unification of Europe?

 - b) In regards to the departure of member states?

 - 5) How do you see the future development of law around drones, and what contribution can German and European law make to such law?
